ASBESTOS AWARENESS

Asbestos awareness training is essential for employees whose work holds the potential to expose them to asbestos. Regulation 10 of the Control of Asbestos Regulations 2006 (CAR 2006) puts a requirement on employers to ensure that their staff have undergone suitable asbestos awareness training so that they are aware of the potential dangers they may face and also the procedures they must follow in the event they are working in the vicinity of asbestos containing materials (ACMs).

Asbestos Awareness training is required to be given to employees whose work could expose them to asbestos, i.e. all demolition, refurbishment workers, maintenance and allied trades where it is foreseeable that their work will disturb the fabric of a building and ACMs may become exposed. This course complies with the requirements of the stated regulations.

Course Outline

Course Objective

By the end of this course your staff will have

- The requirements of the Control of Asbestos at Work
- The properties of asbestos and its effects on health and The associated health risks
- The types uses and likely occurrence of asbestos and ACMs in buildings and plant
