## Site Safety Plus- Awareness

The Construction skills Site Safety Plus **Health and Safety Awareness** training course is designed for those members of the workforce who work, or are about to work in the construction environment, to help them understand the potential hazards that they may face at work on site.

This industry recognised training course provides a practical summary of health and safety, welfare and environmental issues identifying individual responsibilities for looking after themselves and others, what the employer's duties are and what should be done if they think anyone's health and safety is being put at risk.

### Course Outline

- Understanding of individual responsibilities
- Accident preventing and reporting
- Understanding of health and safety law
- Management and control of sites
- Understanding of the need for risk assessments and method statements
- Manual Handling
- Work at height
- PPE
- Electrical safety
- Emergency procedures and Fire prevention

**Duration** 1 days (or 2 x half days)

**Assessment** 25 Multiple-choice questions to conclude the course. All candidates will be expected to be interactive during the course.

**Course Publication** All candidates will be given the Safe Start safety Handbook

A natural progression from this course would be to attend the Site Supervisors' Safety Training Scheme (SSSTS) also available from HACS.
